Privacy Policy — AO Autok

Last updated: [Publication date — to be filled in at release time]

Your privacy matters to us. This Privacy Policy explains how data is handled within **AO Autok**.

1. What Information We Use and How We Protect It

No remote collection: this Application works entirely offline. The Developer does not own any remote servers, and does not collect, transmit, monitor, or store any personal user data (such as vehicle data, deadlines, mileage, notes, or documents you enter).

Local storage: all information you enter (vehicles, reminders, deadlines, documents) is saved exclusively within your device's local memory. The protection of this data depends entirely on the security measures (PIN, biometric data, phone encryption) you have configured on your own smartphone.

Camera and Gallery: the Application lets you attach images (for example, photos of your vehicle, tires, or documents) using the device's camera or gallery. These images are saved exclusively on your device, and are never uploaded to remote servers or shared with the Developer or third parties.

Biometric authentication: some features of the Application (for example, access to confidential vehicle documents) may be protected using your device's biometric authentication (fingerprint, face recognition, or a PIN/pattern you have set). The Application does not collect, record, or have access to biometric data: the entire verification is handled by the Android operating system, which only communicates the outcome to the app (authentication succeeded or failed), without any transmission of the biometric data itself.

Automatic backup: the Application can automatically generate backup copies of your data, saved exclusively on-device in the `Download/AutOK/` folder of your phone. These backups are never transmitted to any remote server operated by the Developer.

2. Sharing Data with Third Parties

Since we do not collect any data, there is no sharing or sale of information to third parties.

If you choose to manually copy or share a backup file generated by the app (for example, on Google Drive or another cloud service), the data will be transferred directly from your phone to the cloud provider you chose, with no involvement or oversight on our part. We encourage you to review your cloud provider's own privacy policy.

3. Native Third-Party Services (Google Play)

The app interfaces with the Google Play Store to manage in-app purchases (unlocking premium features). Google may collect analytics data about installation or device identifiers based on the general consents you have given on your Google account. We do not have access to such identifying data; we only receive anonymous, aggregate numerical reports on overall sales.

4. Children's Online Privacy Compliance

The Application features content suitable for all ages (PEGI 3 rating) and does not collect any data, from adults or minors, as it works entirely locally. If a minor uses the Application, any in-app purchases must be authorized by a parent or legal guardian, as specified in the Terms and Conditions of Use.

5. Your Consent and Changes to This Privacy Policy

By using the Application, you consent to the practices described in this policy. The Developer reserves the right to modify this Privacy Policy at any time (for example, if online features are added in the future). Any changes will be published in this section or within the app, with an updated revision date.

6. Transparency About Support and Future Updates

AO Autok is developed as an independent project. The Developer is committed to keeping the Application compliant and secure, but does not guarantee indefinite development of new features. Features unlocked through in-app purchase correspond to those available at the time of purchase; any future features requiring integration with external services (for example, partners/workshops) may be offered separately. Should development cease, the Application will continue to function normally on the devices of those who have already downloaded it, with no interruption to features already unlocked. If the Application is transferred to another developer (for example, AVLAM App), the assignee will take over as the owner of this Policy, which will be updated accordingly; no personal data is transferred, because we do not collect any.

7. Contact Us

If you have questions, concerns, or requests for clarification about this policy or how the app works, you can reach us at: **[support email — to be created before publication]**.
