Terms and Conditions of Use — AO Autok

Last updated: [Publication date — to be filled in at release time]

Welcome to **AO Autok** (the "Application"). These Terms and Conditions of Use govern the relationship between the Developer of this Application (hereinafter "the Developer", "we", or "our") and the end user (hereinafter "the User" or "you"). By downloading, installing, or using the Application, you fully accept these Terms.

1. Terms of Use and Functionality

The Application provides a personal vehicle management and maintenance service (vehicle data management, deadline reminders, notifications, documents, and statistics). The Application is designed to work entirely locally (offline) on the User's device and is available for Android devices through the Google Play Store.

2. Use by Minors

The Application features content suitable for all ages (PEGI 3 / "Everyone" rating). If the User is a minor, use of the Application and, in particular, any in-app purchases must be authorized and supervised by a parent or legal guardian, who is responsible for the minor's contractual capacity under Italian law.

3. User Account and Backup Management

The Application does not require the creation of a user account on the Developer's systems, nor does it require login credentials.

The Application automatically generates backups of your data, saved locally in the device's `Download/AutOK/` folder. If the User subsequently chooses to manually copy or upload that file to a third-party cloud service (for example, Google Drive), you do so entirely on your own initiative, using your device's native tools. The Developer is entirely uninvolved in this process, has no access to your cloud credentials, and does not manage, view, or store such backup files.

4. In-App Purchases (Feature Unlock)

The Application allows you to manage **one vehicle for free**. To manage more than one vehicle (from the second onward), you can unlock this feature via a **one-time in-app purchase**, valid for all subsequent vehicles.

The unlock is linked to your Google Play account and can be restored on a new device from the Application's unlock screen. Vehicles you already have are never removed or limited. During the testing phases of the Application, purchases made by users enrolled as testers are test purchases and involve no charge.

Payment processing: any financial transaction is handled exclusively by the Google Play Store. The Developer does not collect or process bank or credit card data.

Right of withdrawal and refunds: in accordance with European Union law, refund requests must be submitted directly to the Google Play Store, in line with its refund policies.

5. Intellectual Property

All intellectual property rights related to the Application, including but not limited to source code, graphics, user interface, logos, and trademarks, belong to the Developer. The User is granted only a personal, limited, non-exclusive, non-transferable, and revocable license to use the Application on their own personal devices.

Decompiling, reverse engineering, or duplicating the Application is strictly prohibited.

6. Limitation of Liability (Disclaimers)

The Application is provided "as is" and "as available". The Developer disclaims any liability for:

- Loss of data, vehicles, deadlines, documents, or information entered in the app due to device malfunction, uninstallation of the app, formatting, or loss of the phone. Being an offline app, there are no remote backups on the Developer's servers: preserving your own data is the User's sole responsibility.
- Direct or indirect damages arising from the app's malfunction or from notifications/reminders not delivered by the device's operating system (for example, road tax, inspection, or maintenance deadlines not notified in time). The Application is a support tool and does not replace the User's own independent verification of the regulatory obligations relating to their vehicle.

7. Indemnification

The User agrees to indemnify, defend, and hold harmless the Developer, its collaborators, and partners from any claim, damage, cost, liability, or expense (including legal fees) arising from improper, unlawful, or unauthorized use of the Application by the User, or from a breach of these Terms.

8. Service Continuity

AO Autok is developed as an independent project. The Developer does not guarantee indefinite development of new features. Premium features unlocked through in-app purchase correspond to those available at the time of purchase; any future features requiring external services or integrations may be offered as a separate product. Should development of the Application cease, it will continue to function normally on the devices of those who have already downloaded it, retaining features already unlocked.

9. Assignment of the Application

The Developer may assign or transfer the Application, the related rights and these Terms to a third party (for example, AVLAM App). In that case the assignee takes over as Developer, and features already unlocked by the User remain valid and unchanged. Any change of Developer will be communicated by updating these Terms and the Privacy Policy.

10. Governing Law and Disputes

These Terms are governed by and interpreted in accordance with Italian law. For any dispute arising from the interpretation or performance of these Terms, the competent court shall be that of the Developer's place of residence or domicile, without prejudice to the non-waivable rights of consumers residing in the European Union to bring proceedings before the courts of their own place of residence.
